

# BIO 285 : Biology Internship

This internship allows biology students an opportunity to explore particular careers and employment settings in biology. Students registering for this course work with program faculty and an on-site supervisor to design an appropriate internship experience. Presentation of results to the natural sciences faculty is required. May not be used as a biology major requirement. Graded Pass/Fail.

**Credits** 1-4

**Prerequisites**

- Pre-internship seminar;
- Permission of academic advisor and faculty sponsor.

**Semester Offered**

Offered fall, spring, and summer
