

BIO 485 : Biology Internship

Students in this course enroll for variable credits in a program-approved internship with an appropriate environmental or biological organization. Methods of evaluation are determined by the natural sciences faculty in conjunction with the on-site supervisor. An oral presentation to the natural sciences faculty of the results of the internship is required. A minimum of 40 hours is required for this internship, but more time is recommended. Graded: Pass/Fail.

Credits 1-3

Prerequisites

- Pre-internship seminar;
- Permission of academic advisor and faculty sponsor.

Semester Offered

Offered fall, spring, and summer
