

# ENV 301 : Community-Based Project I (+lab)

The third year is the defining characteristic of the environmental program. All students majoring in environmental studies and environmental science take ENV 301 and 302 for 12 total credits during the third year. In addition to traditional classroom and laboratory exercises students are immersed in an in-depth, yearlong analysis of a local environmental issue with detailed fieldwork and extended site visits. A new project is developed each year with a local community partner. A \$50 lab fee will be charged.

**Credits** 8

## **Prerequisite Courses**

[ENV 101: Exploring Nature: A Sense of Place \(+Lab\)](#)
